DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-27, drawn to a compound having the general structure (I).

Group II, claims 28-30, drawn to a fluorosulfonyl substituted heterocycle having structure (II).

Group III, claims 31-37, drawn to a process for synthesizing fluorosulfonyl-containing compound.

Group IV, claims 38-44, and 46 drawn to a solid electrolyte membrane.

Group V, claims 45, and 47-48, drawn to a catalyst containing the general structure (I).

Group VI, claims 49-50, drawn to the electrochemical cell.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group I is obvious over Desmarteau et al. (US 5,463,005), which discloses a copolymer of tetrafluoroethylene and monomer having the general formula (abstract and claim 1):

Broadly speaking, the present invention is directed to fluorinated monomers having the general formula:

wherein X=CH or N

Z=H, K, Na, or Group I or II metal

R_f=one or more fluorocarbon groups including fluorocarbon ethers and/or sulfonyl groups and/or perfluoronony acid groups

$$\text{R}_f = \text{C}_n\text{F}_{2n-1} \quad (n = 0, 1, 2, \dots)$$

$$\text{Y} = \text{C}_n\text{F}_{2n+1} \quad (n = 0, 1, 2, \dots)$$

$$m = 0 \text{ or } 1$$

Accordingly, the special technical feature linking the inventions, such as a fluorinated sulfonamide (wherein XZ=NH) as shown above, does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, restriction is appropriate.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
